NGUYEN VAN AN

AI / MACHINE LEARNING INTERN

Email: nguyenvanan@example.com | Phone: 0900 123 456 | Ho Chi Minh City, Vietnam

CAREER OBJECTIVE

Information Technology student seeking an AI / Machine Learning internship. Interested in Python, data analysis, machine learning and building practical AI applications. Looking for an opportunity to improve technical skills and contribute to real software projects.

EDUCATION

Bachelor of Information Technology - Example University

2024 - Present | Relevant coursework: Machine Learning, Data Structures, Database Systems, Computer Networks

TECHNICAL SKILLS

Programming	Python, C++, SQL, JavaScript
Machine Learning	Machine Learning, scikit-learn, TF-IDF, Logistic Regression, Cosine Similarity
Data	pandas, numpy, data preprocessing, data analysis
Web	Flask, HTML, CSS, Bootstrap
Database	SQLite, MySQL
Tools	Git, GitHub, VS Code, Linux, Docker

PROJECTS

IT Career Match - Personalized Job Recommendation System

- Built a Flask web application that analyzes student CVs and recommends suitable IT jobs.
- Used TF-IDF and Logistic Regression to predict career categories.
- Applied Content-Based Filtering and Cosine Similarity to rank jobs based on CV content.
- Implemented skill extraction, match score, skill gap analysis and recommendation explanations.
- Technologies: Python, Flask, scikit-learn, pandas, SQLite, HTML, CSS, Bootstrap, Git.

Weather Data Visualization

- Analyzed weather data using Python, pandas and numpy.
- Created multiple visualizations to explore temperature, humidity and weather patterns.
- Practiced data cleaning, preprocessing and exploratory data analysis.

EXPERIENCE / ACTIVITIES

IT Student Projects and Programming Practice

- Practice C++ algorithms and data structures.
- Work with Git/GitHub for source control and team collaboration.
- Build small web, database and machine learning applications.

LANGUAGES

Vietnamese: Native | English: Intermediate

ADDITIONAL KEYWORDS FOR CV TESTING

Python, machine learning, artificial intelligence, data analysis, scikit-learn, pandas, numpy, Flask, SQL, Git, GitHub, Docker, Linux, C++, HTML, CSS, Bootstrap.
